# NEW TECHNOLOGY TRENDS

---

- Traffic on mobile is continuously increasing year by year, people are getting more habitual to trackpads, keyboards has been dead. Every business is moving towards mobile apps, now things has become more handy due to different useful apps for different mobile platforms.

# WHY TO ADAPT THE CHANGE

---

- Mobile Application development represents great in terms of career opportunities.
- You can build your small ideas into reality and compile your them through app store.
- The Indian IT industry, which is projected to more than double in size to \$225 billion by 2020 and mobile apps, cloud computing and analytics will play major role in that.
- Mobile spending will exceed PC spending and grow four times as fast.
- Apps development skills are in demand because fewer people trained in them and the talent pool is not large as of now.

“

Analytics and Mobility could contribute more significantly to the company's revenues in the coming quarters...

*-Wipro chief executive TK Kurien*

# SCOPE IN MOBILITY

---

Domain	
Mobile e-Commerce	It can be easily figure out, that how e-Commerce has created new trends on mobile platforms.

# WHAT WE HAVE SPECIAL TO OFFER

---

- We more believe in building and delivering a real wisdom that requires more learnings than syntax, libraries and API's. To effectively frame a high quality application, you also need to know where to start your project, what makes a good design. So that's the approach we take in our learning-driven courses where you learn how to confidently build apps with the right tools and techniques.
- And top of all, we are offering you a job oriented course. Apps development represent best in terms of jobs in current market.

# WHY WE ?

---

- We the only company providing special training for mobile apps development.
- We strongly believe in some unconventional way of teaching as per changing requirement. Our aim is not merely provide you a training certificate as this is not going to be helpful for you anyways rather we understand the need of result oriented learning and provide you the same. Once you complete training we make it sure that you can complete in IT growing market. We believe that one can not become a developer/programmer with 2 hours training program. You will be put on the projects after the initial training. During the 6 months training period, you go through the real software development life cycle as you work along with the team of technology experts and project managers. To join our 6 months industrial training, you must possess good knowledge of C/C++ and analytic abilities. We are looking for sincere, career conscious students who wanted to pursue their career in IT. In bullets it is following :

- We believe in result oriented training and give you chance to work on live projects with team of technical experts.
- We provide regular interaction session with experts working in reputed MNCs to guide you and answer your queries.
- If you meet our excellence, we can hire you and you may get chance to work in our Research and Development division or in our app development center.
- We provide you training certificate.
- We have discount provision for meritorious students.
